

TEKLIFT

RETRACTABLE LOADING PLATFORM

Product Overview

ROLLING LOADING PLATFORM

Used where simultaneous access is required at several levels from one lifting point. The rolling platform crane deck can be retracted to allow access to a deck or floor level below or above it. The loading deck platform is positioned on the bottom glange of the cantilevered support beams for optimum head room. These crane loading platforms are sometimes known as cantidecks.

Key Benefits

- Fastest loading bay for relocation and installation.
- Large working load capacity and available with multiple configurations to suit most applications.
- Available in a variety of sizes, with bespoke solutions to suit requirements.
- Unique single prop design reduces the weight of the deck and the reaction loadings.
- Quick and simple to install and relocate.
- All installation and relocation training can be provided by our on-site training team.

Product Code	External Width	Internal Width	Outboard Length	Length Retracted	Total Length	Total Weight	WLL
TL15	2200mm	2000mm	2000mm	2000mm	4000mm	1400kg	1500kg
TL20	2200mm	2000mm	3000mm	3000mm	6000mm	1700kg	3000kg
TL27	2700mm	2200mm	4000mm	4000mm	8000mm	2150kg	5000kg
TL35	3500mm	3000mm	4000mm	4000mm	8000mm	3000kg	5000 / 8000kg2
TL45	4500mm	4000mm	4000mm	4000mm	8000mm	3600kg	5000 / 8000kg2

¹Working Load Limit
